

Chen J-J. HRI stress signaling and HbF production. *Blood*. 2020;135(24):2113-2114.

In the first sentence of the article, “by repressing” should read “that promotes.” The error has been corrected in the online version of the article.

Pal K, Nowak R, Billington N, et al. Megakaryocyte migration defects due to nonmuscle myosin IIA mutations underlie thrombocytopenia in *MYH9*-related disease. *Blood*. 2020;135(21):1887-1898.

In the last sentence of the first full paragraph on page 1895, a relevant reference was not cited. The sentence should read, “Although prior work using overexpression of *MYH9*-RD mutants in megakaryoblast cell lines has reported defective migration properties in an SDF-1 gradient,⁷⁴ we not only demonstrate in situ MK migration anomalies in BM but also show that different point mutations associated with the disease inhibit chemotaxis by disparate mechanisms (supplemental Table 1).”

In “References” on page 1898, reference 74 should be added as follows:

74. Pecci A, Bozzi V, Panza E, et al. Mutations responsible for *MYH9*-related thrombocytopenia impair SDF-1-driven migration of megakaryoblastic cells. *Thromb Haemost*. 2011;106(4):693-704.

These changes have been made in the online version of the article.
