

Williams AM, Salehabadi SM, Xing M, et al. Modifiable risk factors for neurocognitive and psychosocial problems after Hodgkin lymphoma. *Blood*. 2022;139(20):3073-3086.

On page 3077, in the last row of Table 1 [Subsequent malignancy (≥ 5 y postdiagnosis)], the number reported (1447 [82.2%]) is actually the number of surviving patients without a subsequent malignancy. The number and percentage of survivors with a subsequent malignancy should be 313 (17.8%).
